

News Tracker Application

DOMAIN : CLOUD APP DEVELOPMENT

TOOL : IBM Cloud,HTML,Javascript,IBM Cloud Object

Storage, python Flask, Kubernetes, Docker, IBM DB2,

IBM Container Registry

PROJECT DESCRIPTION:

There are multiple news-sharing apps used by a single user and are often spammed with notifications. There is also a lot of fake news which gets shared. A news-sharing app wants to help users find relevant and important news easily every day and also understand explicitly that the news is not fake but from proper sources.

Sub problem:

PROBLEM STATEMENT

I am

I am a news reader

"Who"

I'm trying to

Get the appropriate
and true news and
information.

Outcome

but

There are lots of issues and
fake news are available on
online media

Problem/Barrier

because

Everyone having the access
to publish any info on the
sites

Root Cause

which makes me feel

The user cant able to believe and
take actions if the news is
fake. Cant able to trust media

Emotion
